

Why choose Topline to install your solar panels?

Topline have been in the the home improvement business for over 20 years installing and caring for our customers after sales needs. Our solar panel installation teams are fully qualified and certificated for health and safety and give utmost attention and respect to your home and yourselves.

Our reputation has allowed us to enter the solar energy market and we have achieved full certification (see below) to assure our customers that they will receive a first class solar energy product and an efficient installation process.

The Microgeneration Certification Scheme (MCS)

Topline is a member of the Microgeneration Certification Scheme. Our installations are carried out under the Microgeneration Certiification Scheme and therefore will qualify or the feed-in-tariff. The MCS certifies both the technology used to produce the electricity as well as the companies installing microgeneration products. The MCS was developed to assure consumers that the companies and technologies used meet a robust set of industry standards.

The REAL Assurance Scheme

We are also members of the REAL Assurance Scheme which was set up by the Renewable Energy Association as an assurance to consumers of renewable energy products. As a member of the scheme, we must meet the high standards set out in the REAL Consumer Code and we are proud to display the REAL logo as a symbol of our excellence of service.
